MADE FOR YOU

MATERIAL **- QUARTZ -**

No one knows quartz like we do. It's what we've been doing for 30 years. The hardest part of granite, quartz forms around 80% of the raw material used in our composite sinks. You can see why they are the toughest around. We mould quartz with high-grade acrylic resin using a special computer-controlled casting process. The result is a hardened composite material that is resistant to scratches, dents, stains, heat and cracks. That's why our composite quartz sinks last the distance.

OUR QUARTZ KITCHEN SINKS

Our sinks put design-led quality and high performance at the centre of your kitchen. We've spent 30 years getting **Carysil** quartz right. Stone-like in quality, our material is formed from around 80% quartz and 20% acrylic and colour pigments. This gives our kitchen sinks a velvet look and feel, with a finish that's non-porous and enduring. **Carysil** quartz sinks are food-safe, easy to clean and very hardwearing.
